

MUKUL KUMAR TYAGI

• Auburn Hill, MI • +17164463432 • mukultyagi481@gmail.com • [LinkedIn](#) • [Portfolio](#) • [GitHub](#)

Results-driven Business and data analyst, **experience in** financial analytics, credit risk modeling, and data-driven decision-making **across banking, private equity, and insurance sectors**. **Skilled in** Python, SQL, Snowflake, and Power BI, **with hands-on expertise in** portfolio monitoring, underwriting analysis, and predictive modeling. **Experienced in designing** interactive financial dashboards **using** Streamlit and BI tools **to communicate complex insights**. **Proven ability to coordinate between** onsite and offshore teams, **deliver actionable data solutions, and support investment and risk management strategies through advanced analytics**.

SKILLS

- **Programming & Data Engineering:** Python (Pandas, NumPy, Scikit-Learn, PySpark), SQL, JavaScript, AWS (SageMaker)
- **Machine Learning & Analytics:** Regression, Random Forest, XGBoost, Clustering (PCA, K-Means), Recommender Systems, Time Series (ARIMA/SARIMA), Neural Networks
- **MLOps & Big Data:** Model versioning, monitoring & deployment pipelines, ETL pipelines, Databricks, Snowflake, Spark, Hadoop, Kafka
- **Customer & Business Analytics:** Customer journey analytics, lifetime value modeling, A/B testing, causal inference, CRM data integration, marketing analytics
- **Financial & Risk Analytics:** Credit Risk Analysis, Portfolio Monitoring, Underwriting Analysis, Valuation Modeling, Predictive Analytics
- **Visualization & Reporting:** Power BI, Tableau, Excel VBA, Dashboarding, Storytelling for business stakeholders

EXPERIENCE

STELLANTIS

Hybrid (HQ: Auburn Hill, MI)

Data Analyst

Oct. 2025 – Present

- Delivered workload and financial reporting analytics to support forecasts, resource planning, and outsourcing efficiency.
- Automated financial dashboards and streamlined reporting pipelines to enhance visibility into cost and supplier performance metrics.
- Validated data across AirFlow, RP/PentaSAP, and financial systems to ensure data integrity and alignment with CapEx budgets.
- Supported scenario-based financial forecasting for workforce and capacity planning.
- Partnered with Finance and CapEx teams to consolidate reports for leadership reviews and investment decisions.
- Generated risk and performance analytics on supplier portfolios to identify cost optimization and efficiency opportunities
- Utilized **Python, SQL, Power BI, and Streamlit** to design interactive dashboards and automate recurring reporting workflows.

ALFAMODO LIFESTYLE

Remote (HQ: Newark, NJ)

Decision Scientist

Aug. 2025 – Present

- Conducted A/B testing and causal inference analysis to evaluate investment and marketing ROI.
- Delivered predictive and behavioral analytics for customer retention and portfolio segmentation strategies.
- Collaborated with engineering teams to build data pipelines and dashboards in Python and SQL for client performance tracking.
- Presented data-driven insights and actionable recommendations to executive stakeholders across financial and strategic domains.
- Leveraged **quantitative and qualitative data analysis** to support private equity investment decisions and risk assessment.

RAYMOND CORPORATION (Toyota Industries) *(Live Capstone Project)*

Buffalo (HQ: Greene, NY)

Business Intelligence Analyst

Jan. 2025 – Jun. 2025

- Improved forecast accuracy from 82% to 96% by developing **Python-based ARIMA/SARIMA models**, integrating CPI and interest rate data to enhance sales and demand planning decisions.
- Built scalable **data pipelines in SQL and Python** to process forecasting data, aligned with **supply chain & production planning**.
- Partnered with Sales and Supply Chain teams to audit and optimize forecasting tools, closing gaps between **legacy reports** and business requirements, resulting in stronger demand alignment.
- Designed **executive-ready dashboards** and user guides in **Tableau/Power BI**, converting 30+ regression outputs into clear, **actionable insights** for pricing, supply chain, and production planning.
- Delivered insights 2 weeks ahead of schedule, equipping C-suite leaders with early visibility into market trends, accelerating strategic decision-making and improving planning confidence.
- Built **time-series forecasting models** and dashboards that supported financial and production planning, enhancing forecasting accuracy by 14%.

COGNIZANT TECHNOLOGY SOLUTIONS

Remote (HQ: Teaneck, NJ)

Programmer Analyst

Jul. 2021-Jun. 2024

- Led requirement gathering, functional specification documentation, and change control for digital transformation initiatives in the insurance domain.
- Developed **ETL pipelines (Python, SQL, Hadoop)** handling millions of records weekly, enabling actuarial and financial insights.
- Designed and optimized **data models for customer and claims workflows**, improving operational efficiency.
- Supported **digital transformation projects** by analyzing actuarial data and implementing automation (**Excel VBA, Power BI**).
- Conducted system-level data impact assessments and coordinated **UAT and QA** for production deployments.

- Participated in IT audits, ensuring data governance, process compliance, and control gap remediation.

COGNIZANT TECHNOLOGY SOLUTIONS

Remote (HQ: Teaneck, NJ)

Programmer Analyst Trainee

Mar. 2021-July. 2021

- Collaborated with stakeholders to translate user needs into BRDs and FRDs for .NET web applications.
- Developed and maintained VBA macros to automate reconciliation tasks, reducing manual effort.
- Coordinated across teams to optimize project execution timelines and delivery metrics.

ACADEMIC PROJECT EXPERIENCE

- **Optimizing Supply Chain Initiatives Within General Mills** - Conducted secondary research on a manufacturing firm, analyzing its business through SWOT analysis, ABC (Pareto) analysis, Cost-Benefit analysis, and financial reporting.
- **Amazon Prime Video Dashboard | Tableau** - Built an interactive dashboard using large data to analyze Prime Video's content by genre, ratings, global availability, and release trends. Identified that ~80% of content is movies, with Drama as the top genre. Showcased post-2000 content surge and top markets (U.S., India, U.K.). Enhanced skills in data storytelling and entertainment analytics.
- **HR Analytics Dashboard | Excel Project** - I created a dynamic HR Analytics Dashboard built using Excel Pivot Tables, Charts, and Slicers to analyze employee attrition across various dimensions. Key Insights: Highest attrition is among 25–34-year-olds, bachelor's degree holders, Sales & R&D departments, roles like Sales Executive & Research.

EDUCATION

UNIVERSITY AT BUFFALO, THE STATE UNIVERSITY OF NEW YORK

Master of Science, Business Analytics (STEM)

Jun 2025

Relevant Courses: Statistical Analytics, Predictive Analytics, Database Management Systems, Supply chain: Analytics, Design and Modeling.

INDIAN INSTITUTE OF MANAGEMENT

Advanced Certificate Programme in Business and Data Analytics

Jun 2024

LOVELY PROFESSIONAL UNIVERSITY

Bachelor of Technology, Computer Science and Engineering

Jul 2021

CERTIFICATIONS

- McKinsey Forward Program – **Structured Problem Solving, Leadership Communication, Digital Collaboration**
- Microsoft Certified: Azure Fundamentals
